My life
My destiny
Briefly about my experience
Briefly about my future
I'm always open to new interesting projects

> I put so much spirit into the work I'm doing, so I believe in success. I have a great desire to work and develop professionally. I take responsibility for tasks and deal with them effectively. I like to work in a team because I think that I can always learn from my project teammates.

My life

My friends taught me to play the guitar when I was 11. Later I played the African djembe. Since then I like to play it whether alone or not. In my free time, I am fond of recording and DJing. Together with my wife, we often go running and cycling. We love to travel despite COVID :). And of course, I can't but mention the time I spend on self-education.

My destiny

I used to work as a sound engineer. But one way or another, I came across programming, though I considered it too difficult to start WEB developing. I created my first simple landing pages in `WordPress` and native `HTML` + `CSS`. But then I came up with the idea of making the websites more interactive. And started learning `JS` with `Jquery`. It seemed to be just another way of self-development until I realized that I was really into programming. So, my hobby has become my new profession. And I really hope to become a good full-stack developer.

Briefly about my experience

I started out as a freelancer for my friends. Worked with `HTML` + `CSS` + `JQyery` + `JS`. I joined the `Noer` in 2017. And I continued projects by adding `VUE` + `Webpack` + `Figma` + `TargetProcess` + `Git` to my stack. The `Politico` project has been of great benefit. Here I dive deeper into using the technologies I already knew. In addition, I realized the need and began to use `Jira` + `Jest` + `Accessibility` + `BrowserStack` + `Storybook`. At `Politico`, I had 6 sub-projects with different teams. And I really liked the practice of `Code review` + `Scrum` + `English practice`.

Last projects:

Project	Description1	Web site	Technologies and Tools	Responsibilities	D

Project	Description1	Web site	Technologies and Tools	Responsibilities	D
"Politico" is an American political journalism company based in Arlington County, Virginia, that covers politics and policy in the United States and internationally. It distributes content through its website, television, printed newspapers, radio, and podcasts. Its coverage in Washington, D.C. includes the U.S. Congress, lobbying, the media, and the presidency.		https://www.politicopro.com/product	Accessibility Browserstack CSS Figma Git HTML JS Jest Jira Npm Snapshot testing Storybook Unit testing Vue Vuex Yarn Zeplin	Code review Creating Vue components Creating unit tests Documentation support Git flow Time management	@Au

Full presentation.

Briefly about my future

Now I have started to study BE technologies. `Node.js` + `SQL` | `MongoDB` + `Testing`.

I'm always open to new interesting projects
